COMPLETE SOLUTIONS TO OPTIMIZE FERTILITY

OVAFISH

- Cleans the oocytes (mucus, blood, etc.)
- Conservation of oocytes during transport
- May limit the outbreak of vertically transmitted diseases
- For salmonids, marine fish, and freshwater fish
- 10x concentrated

ACTIFISH

- Activation of fertilization
- Improves fertilization rate potential of:
 - low quality milt
 - cryopreserved milt
- For salmonids, marine fish and freshwater fish
- 10x concentrated

Syndel
 USA
 Exclusively distributed
 by Syndel in the USA

REFERENCE NO.	DESCRIPTION	PACKAGING
018499	OvaFish	1 liter bottle
018274	ActiFish	1 liter bottle

FISH MEDIA

STORFISH

- Maturation of gonad milt
- Milt conservation to 2-4 days at 4°C
- Milt dilution for large volume of oocytes
- For salmonids, marine fish, and freshwater fish
- 10x concentrated

FREEZEFISH

- Protein-free media for freezing milt
- High fertilization after thawing
- Can be adapted to different species
- Provided with protocol and support

REFERENCE NO.	DESCRIPTION	PACKAGING
018500	StorFish	1 liter bottle
026520	FreezeFish (for trout species)	Kit of 3 bottles
026880	FreezeFish M (for salmon species)	Kit of 3 bottles
